HalalWatch

A Cloud-based Halal Audit Analytical Dashboard

Introduction

This project aims to increase the efficiency and productivity of halal auditors. By providing a centralized audit dashboard, halal auditors can now assess each company in the country with the same standardized processes. Creating a centralized Halal audit activity platform would then facilitate the auditing process between auditors and manufacturers locally and worldwide. This platform would establish a common protocol in auditing systems for international exchange and Halal trading.

260+ Outlets in Malaysia
2 years to complete internal halal audit

Turn data into actionable insights
Quickly get a pulse of what's happening in business. View performance reports broken down by time, location, department, employees, templates and more.

Approach

- 1 Concept and Story-Boarding Stage
- 2 Requirements gathering and analysis Stage
- 3 Road-Map & Planning Stage
- 4 Design & Usability Stage
- 5 Execution & Iterative testing
- 6 Quality Assurance and Soft Launch
- 7 360° testing & Beta Launch

Get inspection reports instantly
With detailed, automatically generated reports, you'll get real-time insight into what's happening in the field without anybody ever having to write an inspection report again.
