

# IMBAS ARQIS

HALAL VERIFICATION &  
IDENTIFY MANAGEMENT BUSINESS  
APPLICATION SUITE (IMBAS)

©2013/6/1913

## DESCRIPTION

Imbas technology aims to provide usable technologies that make life and decision making easier, faster and cheaper. It's two flagship products, Imbas Arqis and Verify Halal that optimise this philosophy. Imbas Arqis provides a novel solution to age-old problems of verifying the authenticity of halal products and validity of academic certificate.

### Needs

- Uses AES-128 encryption algorithm.
- Contains dynamic data.
- Embeds image.
- Support document management, authentication and verification.

### Application

- Halal Verification**  
By using the smartphones, the user able to capture the details about halal products when scanning the QR codes. based on the product info.
- Identify Management Business Application Suite (IMBAS)**  
IMBAS is the first software in the world that detects bogus degrees using the technology of QR codes. As the result, the end user the employers, can download the IMBAS reader free of charge. By uploading the QR code of the potential employee's transcript or certificate, his or her basic information and educational background can be found easily and securely in the database. Although, the customer which from academic institutions, will be charged an annual license fee to use the software and implement the codes on official documents. Prices will vary based on the size of the institution.

## ARQIS Reader

### Benefits

- Halal Verification**  
Easy access method to get the halal product information by using smartphones.
- Identify Management Business Application Suite (IMBAS)**
  - Time saving when the IMBAS system allows end users to verify certificates authenticity by merely scanning the QR codes instead of cross-checking with the institutions.
