

EZE

Smart Breadboard

(IP/CR/2018/0348)

NEEDS

- Students hardly recognize the electronics components they want to use to make the circuit.
- Students take a lot of time to make a circuit on breadboard.
- Teachers requires time to check the connection made by the students before the circuit can be tested.
- Engineers, technician, developer, hobbyists takes time to assemble and check the connection.

APPROACH

- Penetration of current market – electronics users, students, teachers, developers.
- Reasonable price with innovative functionality – easy to use, make learning easy and fun, save time.

BENEFITS

- EZE Smart Breadboard can solve their problem in teaching and learning about fundamental concept of circuit connection. Can save a lot of time to assemble and check connection.
- Prevent accidents from happening.
- Increase students' independent learning. Teachers can give more focus on other topics.
- Make learning fun and more easier to understand.

COMPETITORS

- Other related breadboard manufacturers.
