

INTEGRATION AT ITS FINEST!

ENHANCING ENERGY EFFICIENCY AND COMFORT

INTRODUCTION

- A wireless automation solution with Energy Audit.
- Centralized control with high level of customization.
- Able to integrate multiple IoT Devices across multiple platforms.

NEEDS

- Too many Internet of Things (IoT) devices across multiple platforms by different manufacturers.
- Inefficient usage of devices due to poor control infrastructure.

APPROACH

- Integrating control and reporting of multiple IoT devices into a single platform.
- Communication and control via wireless technology among IoT Devices.

BENEFITS PER COST

- Approximately RM 9,000 per automated space. Subjected to number of sensors and control points.

COMPETITORS

- Home automation providers.
- Smart home platform companies.
