Community Engagement In Research

Community Engagement In Teaching & Learning

Community Engagement in Service

Community Engagement In Research:

Community-Based Participatory Research (CBPR) :

Is a collaborative approach to research that equitably involves all partners in the research process and recognizes the unique strength that each brings. CBPR begins with a research topic of importance to the community and has the aim of combining knowledge with action and achieving social change through the advancement of knowledge through practice. CBPR is commonly used among researcher and practitioners trying to find answers to questions to better understand and address issues of community concern.

Community Engagement In Service:

Civic Engagement : is service that reflects personal interests and activities performed as a citizen (after work hours or on personal time). Examples of these activities could include volunteering at a local youth club, hospital, library, or coaching a sport team

Community Service : is engaging with the community to provide services for the benefit of the community and may not require specific academic preparation or be linked to specific curricular or research activities

Community Engagement In Teaching & Learning :

Community-Based Learning (CBL):

Is a pedagogical approach that explicitly engages students in studying community issue in order to increase students' understanding and application of academic content.

Service-learning (SL):

Is a teaching and learning approach that provides opportunities for students to apply academic knowledge and skills to respond to identified community needs and enrich the learning experience through guided reflection. The key components of service-learning include

- i. The explicit connection of academic material within a course (credit bearing) and its application to community needs;
- ii. The active reflection by students to foster critical and reflective thinking and enhance the understanding of academic content and social issues.
